Residents & Medical Students Workshop

Finishing Medical School and finishing Residency are huge accomplishments but also times of change and preparation is needed. We have created a workshop for you to help you prepare and navigate all of this as well as an opportunity to get all your questions answered. You will be well prepared and ready to start your next adventure!

For the **MEDICAL STUDENTS**: ERAS (Electronic Residency Application System), which Residency Programs and how many to apply to, how many and how to get letters of recommendation, and your personal statement construction.

For the **RESIDENTS** graduating and looking for their first job: the job search and what to expect, inpatient/outpatient/er, urgent care, DPC, FQHC. What is a contract and how to start a solid review of it. Ongoing requirements - CME, State Board Requirements, ABFM requirements, credentialing once you find your job, and a discussion panel. We will distribute a binder with tabs to all that attend to keep track of all this important information.
